

Production and Energy Monitor

SPINPRO - E9

Increase Production - Save energy - More Profit.

FEATURES

- ◆ Records Production and Energy - No loss of Data.
- ◆ Helps to minimise the breakages.
- ◆ Speed profile can be selected for Ring Frames.
- ◆ Works with Pneumatic / Electrical Piston and Inverter Drive System
- ◆ Early warning alarm on running machine defects.
- ◆ Communication facility with computer.

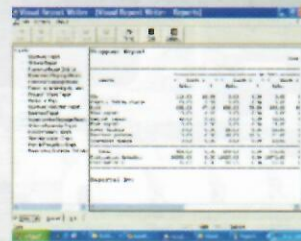

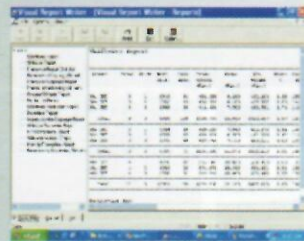

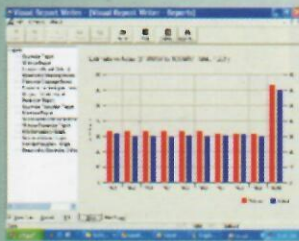

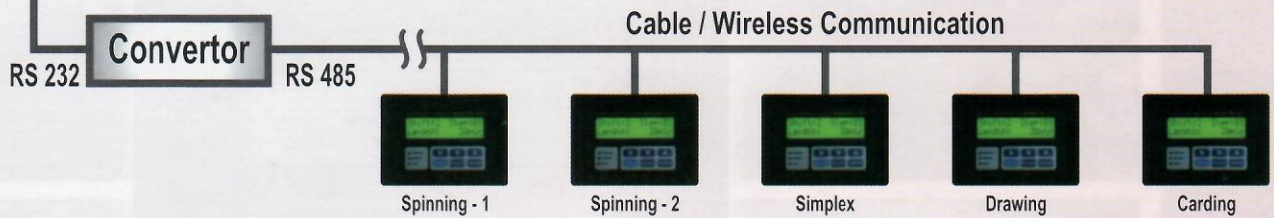

www.induselect.com

ONLINE PRODUCITON & ENERGY MONITORING SYSTEM

- ◆ Continuous monitoring of Energy and Production data.
- ◆ Production and Energy details for individual machines.
- ◆ Graphical presentation of Speed pattern and Energy Consumption
- ◆ Comparison chart of energy and production of all the machines
- ◆ Alarm signals for failures and defects.
- ◆ Alarm signal for exceeding the set level in energy
- ◆ All production and Energy reports
- ◆ No Need of 24 hrs online connectivity

- ◆ Improves production by selecting a suitable speed pattern.
- ◆ Continuous energy measurement supports to optimise speed pattern.
- ◆ TPI monitoring and Alarm.
- ◆ Display all the production data - Kg, TPI/TPM, Speed, Doff, Hanks, Down time and Run Time
- ◆ Displays all the electrical parameters and Energy.

TECHNICAL SPECIFICATIONS

Aux. power supply	85V - 250V AC
Current	5A
Proximity Sensor	NPN - NO Type
Dimensions	160(L) x 105(H) mm

OTHER PRODUCTS

- ◆ Ring Disc Variator Drive for Spinning
- ◆ Electronic Ribbon Breaker
- ◆ Universal Counter : A100 - V1 & V2 / Texpro - 5A
- ◆ Maximum Demand Controller
- ◆ Power Meters
- ◆ Power Factor Controller
- ◆ Ammeter
- ◆ Voltmeter
